

DEFERRED DISCUSSIONS

Transmigration of soul isn't a rebirth or a reincarnation.

The words rebirth and reincarnation are denoting a beginning from the womb of a bodily current mom. On the contrary, transmigration of soul just isn't so.

Transmigration of soul is denoting the method of taking up the physical vehicle of one other one that is already current upon the physical world. Transmigration is undergone after an entity crosses previous the stage from where delivery from the womb of a physical mother can happen.

But because the macrocosmic laws are equally applicable to every microcosm, so this strategy of taking up the bodily car of another particular person can only start after an settlement is made with that particular person and that too in the subtle or astral worlds.

When a person sleeps, then the astral body or Sookshma Sharira goes out of the physical physique and it's at the moment when the astral car is roaming freely within these vast macrocosmic fields of past realms that an settlement between the one who to be transmigrated and the donor of the bodily automobile, will get made.

Once the settlement is made, then there are also needed helpers for this job. These helpers can be people who know about this course of. These knower's might be sages who reside upon that physical world or in beyond worlds or they may even be divine beings of past realms. [Parkaya Pravesh](#)

In the course of the means of transmigration of soul, the diamond white wire which is emanating out of the highest of head of the bodily vehicle of the donor and is of a triangular form, is lower off ... And immediately the cord of the transmigrating one is linked to the same place. This denotes the completion of technique of transmigration. This diamond white cord is also termed as the silver twine in the Biblical lore's and this has also been termed as Brahma Naadi in the much earlier Yoga Tantra's.

Relying on the evolutionary standing of the one who's coming into into the method of transmigration, are the helpers who get chosen for this aiding throughout the strategy of transmigration of soul. Higher is the evolutionary standing of the one who is getting transmigrated, greater would even be the evolutionary standings of the helpers who help in that process of transmigration.

Basis above, if the one who is transmigrating is already that one that has gone beyond the beyond and is just returning again as a macrocosmic instrument or as an instrument of Maker's Makings and that too for doing certain specific jobs which are either dictated by macrocosmic deities or by macrocosmic divinities or by time and its eternal cycles i.e. during change of a human of divine age cycle, then such transmigrations can only be assisted by a Non Human Man (i.e. Amanav Purusha) and by one or more of the macrocosmic deities of those a lot past or subtle systems.

And since transmigration of soul is the process of taking on a physical automobile which is already present in the physical world, so this process was additionally referred to as as Parkaya Pravesh within the Vedic and Yogic Sanskrit lore's. Biblical lore have termed this technique of transmigration as that of a Virgin Start.

And there are also these cases where the one who was to transmigrate to a lower world is already resting in an impressionless state of his personal consciousness i.e. Samskara Rahit Awastha of Chitta, which as such denotes a situation of existence which is past the purviews of the Maker's Makings, so for such a one to transmigrate to a lower world, another appropriately developed aspirant is implanted into that world i.e. that appropriately advanced soul is made to take delivery in that world, so as to arrange the bodily automobile for the later transmigrating one. However there are various types of transmigrations, so our discussed one is not the only kind of transmigration.

As it's within any earthly agreement, so is it within the refined settlement of transmigration of soul. Thus when the agreement is made between the transmigrating one and the one who's the donor of the bodily car, then the donor can ask for something from the transmigrating one as a result of from the macrocosmic standpoint, donating of 1's own bodily vehicle is naught however a supreme sacrifice.

And after this settlement is made and then transmigration undergone already, then the one who transmigrated also needs to comply to all that was agreed for in the course of the technique of transmigration.

Foundation above, the donor may even transfer all his good and bad deeds that he had ever carried out throughout any previous stage of his evolutionary existence, but within the purviews of the rules, process and laws of the Maker's Makings. This was my case this time around because the donor transferred all his Karmas to me.

And if that transmigrating one who adopts these Karmas of the donor, is already beyond Karmas and Karma Phala (i.e. cause and results or deeds and fruits respectively) then since as per the "precept of everlasting evolution" there can't be any regression from an already attained evolutionary standing, all these Karmas which have been taken over, would also must be nullified and their impressions unseeded from throughout the consciousness orb or Chitta of the transmigrating one. Unless this is done, that transmigrating one can't even begin doing that for which he or she had transmigrated. This means of unseeding the impressions that had been taken over from the donor may even take up to 28 years, as was my case this time round.

And even when above is a matter of reality, yet after unseeding of all adopted impressions, one final and final impression i.e. Antim Samskara, always stays as a result of this last and closing impression can't ever be destroyed or unseeded by any transmigrated entity. The last and closing impression can solely be unseeded by the unique holder of it i.e. the donor of the physical automobile.

Thus as far as the transmigrated one is concerned, after unseeding of all impressions aside from the final and last impression is done, then this final impression or Antim Samskara, additionally get evicted out from the top of the head of the physical automobile of that transmigrated one and then this impression finally gets transferred to the original donor of the bodily automobile. So no matter which of the subtler realms that donor may be residing at that time, when the last impression get evicted out of the highest of head of the transmigrated one, then it would attain that donor and that donor would additionally must adopt it.

And it will definitely is that this impression which ensures that the donor would return back in future, but only for one last and ultimate time so as to unseed the last impression and thus “Be Liberated”.

I wrote “Be liberated” and never “Get Liberated” as a result of getting is by way of the path of deeds and on the contrary, “being” is the natural path which rests past deeds. That pure path is inside everybody and it may be recognized by way of the inward path or path of self realization.

So foundation above, during those distant times, that little little one whose physique was taken over this time round and who had requested for taking up all his past deeds and fruits, would definitely be returning again to bodily realms so as to stroll those paths which unseed his last impression and thus would he also “Be Liberated”.

Transmigration can be mirrored in the astrological delivery charts, however to know this aspect the astrologer would wish to carry the timeless lineage of Vedanga and Jyotish along with being blessed with a divine eye to see it after learning about it within the start charts of the donor.
